3,4,14, 15 & 16
Not shown in illustrations.

The above list is intended as a general guide to the basic uniform and equipment that the average combat infantryman would have worn in Northwest Europe in 1944-45. It is recommended not only for historical accuracy but also because it will be acceptable at almost any event. Members are always free to expand beyond this basic impression and wear any uniform or equipment appropriate for particular historical simulations or displays.
